

Bug ID	Title	Module	Severity	Priority	Test Case ID	Enviroment	Preconditions	Steps to Reproduce	Actual Results	Expected Results	Status
BUG-Login-01	Password show/hide icon disappears after password field loses and regains focus	Authentication	Medium	Medium		Windows 11, Chrome Version 145.0.7632.160 Microsoft Edge Version 145.0.3800.97 Firefox 147.0.1	* User is on the login page * Password field is visible	1)Open the login page. 2)Click inside the password field. 3)Enter a password. 4)Click the show/hide icon and verify it works. 5)Click outside the password field. 6)Click back inside the password field.	In Chrome: show/hide icon does not appear in the password field. In Firefox: show/hide icon does not appear the password field. In Edge: behavior is different, the password show/hide icon is no longer visible after the field loses focus and is selected again	The password show/hide icon should remain visible or reappear when the password field is focused again, especially when the field still contains a value.	CLOSE / FIX
BUG-Login-02	Ctrl+C and Ctrl+X keyboard shortcuts do not work in password field while Ctrl+A and Ctrl+V function normally	Authentication / Login	Low	Low		Windows 11, Chrome Version 145.0.7632.160 Microsoft Edge Version 145.0.3800.97 Firefox 147.0.1	* User is on the login page * The password field is editable.	1)Open the login page 2)Click inside the password field 3)Enter a password 4)Press Ctrl+A to select the password 5)Press Ctrl+C to copy the password 6)Press Ctrl+X to cut the password 7)Press Ctrl+V to paste text into the password field 8 Press Ctrl+Z to undo the last action into the password field	Ctrl+A works and selects the text Ctrl+V works and pastes text into the field Ctrl+C does not copy the selected password Ctrl+X does not cut the selected password Ctrl+Z works and undo the last action in the password field	* Keyboard shortcuts should behave consistently according to application requirements If clipboard operations are allowed, Ctrl+C and Ctrl+X should function normally. If clipboard operations are intentionally restricted for security reasons, all related shortcuts should be handled consistently or documented in the requirements	CLOSE/ IT'S NOT A BUG
BUG-Login-03	Remember Me checkbox does not affect session persistence	Authentication / Login	Medium	Medium		Windows 11, Chrome Version 145.0.7632.160 Microsoft Edge Version 145.0.3800.97 Firefox 147.0.1	* User has a valid registered account * User is on the login page	Scenario 1 1. Enter valid email and password 2. Leave Remember Me checkbox unchecked 3. Click Log in button 4. Verify user is successfully logged in 5. Close browser completely 6. Reopen the browser 7. Navigate to application URL Scenario 2 1. Enter valid email and password 2. Check the Remember Me checkbox 3. Click Log in button 4. Verify user is successfully logged in 5. Close browser completely 6. Reopen the browser 7. Navigate to application URL	* User session behavior is the same in both cases. * The user remains logged in after reopening the browser regardless of whether the Remember Me checkbox is selected or not	Checking Remember Me should persist user authentication across browser restarts If Remember Me is checked, the user should remain logged in after restarting the browser If Remember Me is unchecked, the user session should end when the browser is closed and the user should be required to log in again	CLOSE / FIX
BUG-RESET-01	Password reset accepts current password as new password	Authentication – Reset Password	Medium	Medium		Windows 11 Chrome Version 145.0.7632.160 Microsoft Edge Version 145.0.3800.97 Firefox 147.0.1	User account exists with a known password. User has requested a password reset. User has opened the Reset Password page using a valid reset link.	1. Navigate to the Forgot Password page 2. Enter a registered email address and request a password reset 3. Open the password reset link received via email 4. Enter the account email in the Email Address field 5. Enter the current password in the New Password field 6. Enter the same password in the Confirm New Password field 7. Click Reset Password	The system successfully resets the password even when the new password is identical to the user's current password.	The system should reject the password reset request when the new password matches the current password and display a validation message such as: "New password must be different from the current password."	CLOSE / no necessary
BUG-Login-04	Google login button is unresponsive on Login page and Registration Page	Authentication / Login	Critical	High	TS-AUTH-044	Windows 11, Chrome Version 145.0.7632.160 Microsoft Edge Version 145.0.3800.97 Firefox 147.0.1	* User is on Login Page/ Registration Page * User is not authenticated	1. Open application 2. Navigate to the Login page/Registration page 3. Click on "Google" button	* Nothing happens when clicking the button * No redirect * No loading indicator * No error message	* User should be redirected to Google authentication page * Or a popup should appear to select Google account	BUG
BUG-Login-05	LinkedIn login button is unresponsive on Login page and Registration Page	Authentication / Login	Critical	High	TS-AUTH-045	Windows 11, Chrome Version 145.0.7632.160 Microsoft Edge Version 145.0.3800.97 Firefox 147.0.1	* User is on Login Page/ Registration Page * User is not authenticated	1. Open application 2. Navigate to the Login page/Registration page 3. Click on "LinkedIn" button	* Nothing happens when clicking the button * No redirect * No loading indicator * No error message	* User should be redirected to LinkedIn authentication page * Or a popup should appear to select LinkedIn account	BUG

BUG-REGIS-01	Registration allows user creation when First Name field is empty	Authentication / Registration	High	High	TS-AUTH-059	Windows 11, Microsoft Edge Version 145.0.3800.97	* User is on Registration Page	1. Open the registration page 2. Fill in all required fields except First Name 3. Click Register / Submit 4. Check whether validation message appears 5. Check email inbox for verification email 6. Log in with admin credentials and verify whether the user record was created	The form is submitted successfully with an empty First Name. No verification email is received, but the user account is created in the admin side.	The system should prevent form submission when First Name is empty and display a validation message such as "First Name is required." No user account should be created, and no registration process should continue.	FIX
BUG-REGIS-02	Registration allows numeric values in First Name field	Authentication / Registration	Medium	Medium	TS-AUTH-061	Windows 11, Microsoft Edge Version 145.0.3800.97	* User is on Registration Page	1. Open the registration page 2. Enter a numeric value in the First Name field (e.g., 12345) 3. Fill in all other required fields with valid data 4. Click Register / Submit	* The system accepts numeric input in the First Name field * No validation message is displayed * The form is submitted successfully	* The system should reject numeric input in the First Name field * A validation message should be displayed (e.g., "First Name must contain only letters") * Form submission should be blocked	FIX
BUG-REGIS-03	First Name field allows input exceeding maximum character limit	Authentication / Registration	Medium	medium	TS-AUTH-062	Windows 11, Microsoft Edge Version 145.0.3800.97	* User is on Registration page * First Name field is visible	1. Open registration page 2. Enter a very long string in First Name field Example: aaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaa aaaaaaaaa (50+ chars) 3. Fill other required fields 4. Click Submit	* The system accepts input beyond the maximum limit * No validation message is displayed * Form is submitted successfully	* The system should restrict input to the defined maximum length (e.g., 30 characters) * OR show validation message: "First Name cannot exceed X characters" * Submission should be blocked	FIX
BUG-REGIS-04	Privacy Policy link is not functional	Authentication / Registration	Medium	High	TS-AUTH-085	Windows 11, Microsoft Edge Version 145.0.3800.97	* User is on the Registration page * Privacy Policy link is visible	1. Navigate to the Registration page 2. Locate the Privacy Policy link 3. Click on the link	* Nothing happens when the link is clicked * No redirection, no new tab, no response	* User should be redirected to the Privacy Policy page * Page should load successfully with correct content	FIX
BUG-REGIS-05	Terms of Service link is not functional	Authentication / Registration	Medium	High	TS-AUTH-084	Windows 11, Microsoft Edge Version 145.0.3800.97	* User is on the Registration page * Terms of Service link is visible	1. Navigate to the Registration page 2. Locate the Terms of Service link 3. Click on the link	* Nothing happens when the link is clicked * No navigation or feedback is triggered	* User should be redirected to the Terms of Service page * Page should load correctly	FIX
BUG-REGIS-06	First Name and Last Name fields do not enforce consistent capitalization formatting on and preserve multiple internal spaces on Registration Page	Authentication / Registration	Medium	Medium	TS-AUTH-097	windows 11 Microsoft Edge Version 145.0.3800.97		1. Open the Registration page. 2. Enter: First Name: Madeleiny Maria Last Name: De Leon 3. Complete all other required fields with valid data. 4. Submit the form. 5. Check the saved/displayed values.	* Multiple spaces between words are preserved and displayed exactly as entered * Mixed capitalization is accepted and saved without clear normalization or consistent formatting behavior.	* Multiple spaces between words should be normalized to a single space * The system should apply a defined capitalization rule consistently across Registration If title case is required, the names should be normalized accordingly	FIX
BUG-User-01	Profile page allows numeric values in First Name and Last Name fields	User Portal	Medium	Medium	TS-USER-013	Windows 11 Microsoft Edge Version 145.0.3800.97	* User is logged in * User is on the profile edit page * First Name and Last Name fields are visible	* Enter numeric values in the First Name field "Made123" * Enter numeric value in the Last Name field "Nin1234" * Click Save Changes	* Form accepts numeric characters in First Name and Last Name fields * No proper validation is shown * Invalid data is saved or allowed to proceed	* System should reject numeric characters in name fields * Validation message should appear, such as: "Name cannot contain numbers" * Form should not be submitted	FIX
BUG-User-02	Profile page allows special characters in First Name and Last Name fields	User Portal	Medium	Medium	TS-USER-014	Windows 11 Microsoft Edge Version 145.0.3800.97 Profile Edit Page	* User is logged in * User is on the profile edit page * First Name and Last Name fields are visible	1. Enter Made!@# in the First Name field 2. Enter Nin%*& in the Last Name field 3. Click Save Changes	* Form accepts special characters in First Name and Last Name fields * No proper validation is shown * Invalid data is saved or allowed to proceed	* System should reject special characters in name fields * Validation message should appear, such as: "Name cannot contain special characters" * Form should not be submitted	FIX
BUG-User-03	Profile page allows input exceeding max character limit for First Name and Last Name	User Portal	Medium	Medium	TS-USER-015	Windows 11 Microsoft Edge Version 145.0.3800.97 Profile Edit Page	* User is logged in * User is on the profile edit page * First Name and Last Name fields are visible	1. Enter a value longer than 35 characters in the First Name field 2. Enter a value longer than 35 characters in the Last Name field 3. Click Save Changes Test Data: Use any string longer than 35 characters	* Fields accept more than 35 characters * No validation message is shown * Invalid data is saved or allowed to proceed	* System should restrict input to 35 characters or show validation error * Validation message should appear, such as: "Name cannot contain over 35 characters" * Form should not be submitted	FIX

BUG-User-04	Phone Number field accepts invalid formats (letters, short numbers, and special characters)	User Portal	Medium	Medium	TS-USER-019	Windows 11 Microsoft Edge Version 145.0.3800.97 Profile Edit Page	* User is logged in * User is on Profile Edit page * Phone Number field is visible	Case 1 – Letters: 1. Enter abc123 in Phone Number field 2. Click Save Case 2 – Short Number: 1. Enter 123 in Phone Number field 2. Click Save Case 3 – Special Characters: 1. Enter 123-abc in Phone Number field 2. Click Save	* Field accepts invalid inputs (letters, short numbers, mixed characters) * No validation message is displayed * Form is submitted with invalid phone number	* Phone Number field should accept only valid numeric formats * Validation should enforce: Only digits (or allowed format like +1 123-456-7890 if specified) Minimum and maximum length (e.g., 10 digits) * Error message should appear, such as: "invalid phone number format" * Form should not be submitted	FIX
BUG-User-05	User cannot reapply for coach position after application is rejected	User Portal	High	High	TS-USER-043	Windows 11 Microsoft Edge Version 145.0.3800.97 Profile Edit Page	* User is logged in * User previously submitted a coach application * Application status = Rejected	1. Log in as a user with a rejected coach application 2. Navigate to Become a Coach section 3. Observe the UI message 4. Attempt to submit a new application	* System displays message: "You have already submitted a coach application." * User is blocked from reapplying * No clear way to submit a new application	* After rejection, user should be able to: - Click "Reapply for Coaching" OR - Submit a new application form * System should allow reapplication and update status to Pending Review	BUG
BUG-User-06	Uploaded portfolio images are not displayed correctly on the Become a Coach page	User Portal	Medium	Medium	TS-USER-050	Windows 11 Microsoft Edge Version 145.0.3800.97 Profile Edit Page	* User is logged in * User is on the Become a Coach page * Valid image files are available	1. Log in as applicant 2. Navigate to Become a Coach 3. Upload valid portfolio image(s) 4. Observe the uploaded images on preview area	* Applicant page shows incomplete/broken/placeholder image preview	* Uploaded images should display correctly on the applicant page after upload	FIX
BUG-User-07	Reapply form is prefilled with previous rejected application data instead of opening as a blank form	User Portal	Medium	Medium	TS-USER-053	windows 11 Microsoft Edge Version 145.0.3800.97 Profile Edit Page	* User is logged in * User previously submitted a coach application * Application status is Rejected * Reapply for Coaching button is visible	1. Log in as a user with a rejected coach application 2. Navigate to the coach application status section 3. Click Reapply for Coaching 4. Observe the application form fields and uploaded documents section	* The reapply form opens with the previous answers already filled in * Previously uploaded portfolio files/images are still shown in the form	* Reapply should open a blank application form * Text fields should be empty * Previously uploaded files should not remain attached * User should submit a fresh application unless product requirements explicitly specify edit/reuse behavior	BUG
BUG-User-08	Application form allows submission with leading spaces, preserve multiple internal spaces and do not enforce consistent capitalization formatting in text fields	Become a Coach	Medium	High	TS-USER-054	Windows 11 Microsoft Edge Version 145.0.3800.97 Become a Coach Page	* User is on the Coach Application form.	1. Navigate to the Coach Application form 2. Enter any text in the fields with leading spaces in the application form - Why do you want to become a coach? - Your Experience (Optional) - Specialization (Optional) 3. Submit the application	* The application is successfully submitted with leading spaces preserved in the input fields.	* The system should: Either trim leading and trailing spaces automatically, OR Prevent submission and show a validation error	FIX
BUG-User-09	First Name, Last Name and Location fields do not enforce consistent capitalization formatting on and preserve multiple internal spaces on Profile Page	User Portal	Medium	Medium	TS-USER-055 TS-USER-056	Windows 11 Microsoft Edge Version 145.0.3800.97 Profile Edit Page	* User is logged in * User is on the profile edit page * First Name and Last Name fields are visible	1. Open the Registration page. 2. Enter: First Name: Madeleiny Maria Last Name: De Leon Location: B oGOTA 3. Complete all other required fields with valid data. 4. Submit the form. 5. Check the saved/displayed values.	* Multiple spaces between words are preserved and displayed exactly as entered * Mixed capitalization is accepted and saved without clear normalization or consistent formatting behavior.	* Multiple spaces between words should be normalized to a single space * The system should apply a defined capitalization rule consistently across Registration If title case is required, the names should be normalized accordingly	FIX
BUG-User-10	View Details button redirects to Plan Selection page instead of Subscription Details page	User Portal	Medium	High	TS-USER-082	windows 11 Microsoft Edge Version 145.0.3800.97 Profile Edit Page	* User is logged in * User is on profile Page * User selects Subscription tab	* Navigate to Subscription tab * Locate View Subscription Details * Click View Details button	* User is redirected to Choose Your Plan page	* User should be redirected to Subscription Details page OR * A modal should open showing: - Plan info - Billing cycle - Renewal date - Payment details	BUG
BUG-User-11	"Manage Payment" button redirects to subscription plan page instead of payment management page	User Portal	Medium	High	TS-USER-084 TS-USER-085 TS-USER-086 TS-USER-087	Windows 11 Microsoft Edge Version 145.0.3800.97 Profile Edit Page	* User is logged in * User navigates to Subscription / Payment Methods section	1. Go to Profile page 2. Navigate to Subscription tab 3. Locate Payment Methods section 3. Click on "Manage Payment" button	* User is redirected to the "Choose Your Plan" (subscription plans) page instead of a payment management page.	User should be redirected to a Payment Management page where they can: Add card Edit card Remove card	BUG

BUG-User-12	"View Invoices" button redirects to subscription plan page instead of invoice list page	User Portal	Medium	High	TS-USER-088 TS-USER-089 TS-USER-090	Windows 11 Microsoft Edge Version 145.0.3800.97 Profile Page	* User is logged in * User is in Billing History section	1. Navigate to User Portal 2. Go to Billing History 3. Click on "View Invoices" button	* User is redirected to the "Choose Your Plan" (subscription plans) page instead of the invoice list page.	User should be redirected to an Invoice List page displaying: List of invoices Invoice details (date, amount, status) Option to download/view invoices	BUG
BUG-User-13	Cancel subscription flow shows conflicting messages and functionality not implemented	User Portal	Medium	High	TS-USER-092	windows 11 Microsoft Edge Version 145.0.3800.97 Profile Page	* User is logged in * User has an active subscription	1. Navigate to Subscription section 2. Locate Cancel subscription section 3. Click on Cancel button 4. Observe confirmation popup 5. Click OK	* First popup shows confirmation message: --> "Are you sure you want to cancel your subscription?" After clicking OK, a second popup appears: --> "Cancel subscription functionality will be available once backend endpoints are implemented."	After confirmation: Subscription should be successfully canceled OR If feature is not implemented → user should see a single clear message indicating that	BUG
BUG-User-14	Toggle switches are not horizontally aligned in Email Notifications section	User Portal	Low	Low	TS-USER-099	windows 11 Microsoft Edge Version 145.0.3800.97 Profile Page	* User is logged in * User is on the Notifications tab	1. Navigate to Profile Page 2. Select the Notifications section 3. Observe the Email Notification section 4. Compare the horizontal alignment of the toggle switches across rows	* Toggle switches are slightly misaligned between rows * Their horizontal/vertical positioning is not consistent across all items	* All toggle switches should be perfectly aligned vertically * Toggle buttons should appear in a consistent position across all rows	BUG
BUG-User-15	Notification toggle states do not persisted after page refresh	user Portal	Medium	Medium	TS-USER-100	Windows 11 Microsoft Edge Version 145.0.3800.97 Profile Page	* User is logged in * User has existing preferences OR is a new user with system defaults	1. Navigate to Profile Page 2. Select the Notifications section 3. Enable or disable one or more notification toggles 4. Refresh the page	* After refreshing the page, the notification toggles do not retain the selected states * The toggles revert to previous or default values instead of the user's latest changes	* The selected toggle states should be saved and persist after page refresh * Toggles should reflect the user's latest selections	BUG
BUG-User-16	Notification toggle preferences are not persisted after refresh and re-login	User Portal	Medium	Medium	TS-USER-110 - 111	Windows 11 Microsoft Edge Version 145.0.3800.97 Profile Page	* User is logged in * User is on Profile page	1. Navigate to Privacy tab 2. Locate the privacy settings 3. Change one or more toggle settings 4. Refresh page/Log out and log in again 5. Navigate back to privacy tab 6. Observe toggles states	* Updated notification toggle selections are not retained after refresh and/or after logging out and logging back in. Toggles revert to previous or default states.	* Selected notification preferences should be saved and remain the same after: page refresh logout/login	BUG
BUG-User-17	Profile visibility toggle does not apply expected visibility behavior	User Portal	Medium	Medium	TS-USER-113	Windows 11 Microsoft Edge Version 145.0.3800.97 Profile Page	* User is logged in * User is on Profile page	1. Navigate to Privacy tab 2. Locate the privacy settings 3. Turn ON Public Profile toggle settings 4. Use another user account to check for the profile "Madeleiny Nino"	* Profile visibility behavior does not update as expected after changing the setting	* Changing the profile visibility setting should correctly affect the user's profile visibility according to requirements	BUG
BUG-User-18	Toggle switches are misaligned across Privacy Setting Items	User Portal	Medium	Medium	TS-USER-112	Windows 11 Microsoft Edge Version 145.0.3800.97 Profile Page	* User is logged in * User is on Profile page	1. Open Privacy tab 2. Observe the toggles states	* Toggle switches are slightly misaligned between rows * Their horizontal/vertical positioning is not consistent across all items	* All toggle switches should be perfectly aligned vertically * Toggle buttons should appear in a consistent position across all rows	BUG
BUG-User-19	Success message is not cleared when a subsequent password update attempt fails	User Portal	Medium	Medium	TS-USER-119	Windows 11 Microsoft Edge Version 145.0.3800.97 Profile Page	* User is logged in * User is on Change Password page	1. Change password successfully with valid inputs 2. Confirm success message is displayed 3. Attempt to change password again with invalid input (e.g., mismatched passwords) 4. Click Update Password	* Success message remains visible after new attempt * Error message appears simultaneously * Conflicting messages are displayed to the user	* Previous success message should be cleared * Only the relevant error message should be displayed	BUG
BUG-User-20	Incorrect current password is not properly validated during password update	User Portal	High	High	TS-USER-116	Windows 11 Microsoft Edge Version 145.0.3800.97 Profile Page	* User is logged in * User is on Change Password page	1. Enter an incorrect current password 2. Enter a valid new password 3. Confirm the new password correctly 4. Click Update Password	* Password is updated even when current password is incorrect * Success message is displayed even though the current password is incorrect	* System should display an error message such as: "Current password is incorrect" * Password should not be updated * No success message should be shown	BUG
BUG-User-21	Show/Hide password icon disappears after losing and regaining focus	User Portal	Medium	Medium	TS-USER-123	Windows 11 Microsoft Edge Version 145.0.3800.97 Profile Page	* User is on Change Password page	1. Enter a password in any password field 2. Verify Show/Hide icon appears 3. Click outside the field 4. Click back into the same field	* Show/Hide icon appears when typing initially * After clicking outside and returning to the field, the icon disappears * User can no longer toggle password visibility	* Show/Hide icon should remain visible when the field contains input * User should be able to toggle visibility at any time	BUG

BUG-User-22	"Enable 2FA" action shows confirmation flow but feature is not implemented	User Portal	Medium	Medium	TS-USER-125	Windows 11 Microsoft Edge Version 145.0.3800.97 Profile Page	* User is logged in * User navigates to Privacy Settings / 2FA section	1. Navigate to Privacy settings 2. Locate Two-Factor Authentication 3. Click on "Enable 2FA"	* A popup message appears: "Two-factor authentication setup will be available soon." * No setup flow is initiated * Feature is not functional after user interaction	* User should be redirected to a 2FA setup flow, such as: QR code generation Authenticator app setup Verification step
